

GATI SHAKTI VISHWAVIDYALAYA

C Programming Language

Lab Assignment – 7

Instructions:

- 1. Write all the program and execute.*
 - 2. Maintain soft copy of all codes and prepare a Lab Record consisting all hand written programs.*
-

1. Write a program to find the largest of 3 numbers using dynamic memory allocation.
2. Write a program that dynamically allocates memory for an integer array of size 'n', where 'n' is provided by the user and display it.
3. Write a program that dynamically allocates memory for a string entered by the user. Print the string back to the user.
4. Write a program that dynamically allocates memory for an integer array. Allow the user to keep adding elements to the array dynamically. When the array is filled, dynamically resize it to accommodate more elements.
5. Write a program which declare a structure employee having its details (name, age, id, address, salary). Take these values from the users and print the details.
6. Write a program using structure to read and display any 5 details of 2 students without using array of structure.
7. Write a program to find largest of three numbers using structure.
8. Write a program using structure for addition of two complex numbers.
9. Write a program to read and display information of 5 employees using array and structure.
10. Write a program to read the details of all students in the class. Then edit the details of ith student and redisplay it.
